

Interface for Social-Psychology Design Patterns

m137

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
The PsYOPs seem to work in different Groups, one group tries to manipulate the Whistleblower or Whitehat, the other group seems to manipulate the family of the Whistleblower. They have touring complete avatars of all people you know, so it's quite hard to find out what is true communication(s) and what is simulation. Separation from his social systme makes it more difficult. One move of my Shrink was to tell me to catch up on my past, and my father he told not to catch up with his past. So he can inject the word "catch up" to generate an antagonizing situation (m50). I guess technically there would be some interface between such two world-views, maybe some sort of crash detection that wants to crash people intentionally. further research required.

Porn

m12

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
Reproduction (therefore sex) was vital for preservation of the species. This early Part of brain has influence to individuals. If your NeoCortex doesn't know about Vulnerability they can easily psy-backdoors you, for example sell overpriced cars by simply putting a halfe naked women on top of car (eg t1 card: "The woman ins inclusive.") Limbic system, is responsible for processing emotions & instinctive behavior. **Sexualitätsdispositiv (Michael Foucault)** Can drive people to do things they would normally not do. A healthy and consensual sexual life is maybe even good for the Endocrine System. The old People play such cards (and obfuscate with m52) mainly to obfuscate technology cards, especially if we find prove that would bring the older to jail. **Websites like Youporn should only allow kosher (BDSM-Jporn, one could implement that with initial scene where the slave agrees with what will happen and a scene after the act where she / he says that everything is ok.**

Possibly only kids that are being isolated begin to watch excessive porn, so before you punish a young adult because he consumes porn analyze first his childhood.

don't lock under this image (in the original svg)

winning & arrogance

m40

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
Kids unfortunately learn early that they must be the fittest and the first. ("maybe" some parents and technology cards induce that intentionally, see sk1 card)

to avoid that behavior I repeat loud to myself

- * first you win
 - * then you have fame
 - * then you are getting ignorant and lazy
 - * then you will have a knife in your back
- Don't celebrate wins to much, there are lot young people being abused and blackmalled by older generations. Better invest time to rescue younger victims. unknown: The root of this useless behavior is maybe the school, where different kids battle to answer as first, and then remotely enjoy the fame

Secret Curt

m156

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
Not verified so far... Secret Curt's can have different faces: For example people at technoparties, Metal Parties, mental institutions, military "meeting" that is in fact a curt... these curts are secret (often without telling the accused that he is accused) because it mostly sentences scapegoats or people that are gifted in eg. hacking or mindcontrol hacking. Technical implementation would be simple, the jury and the accused just gets different content in the D85 (t40 Card or even t1 Card). The accused would therefor be "legimately" a slave of the other people, and they even feel good that they have a slave. If the accused dies and the jury finds out that he was just a scapegoat the would feel bad and will be enslaved too. The USA Porn Room knew even what I clicked on youporn and then told some swiss people that accused me because of what I clicked and told me, that I must pay that back because porn consume causes PAIN for the producer, so I produced and got secretly sentenced again. this sort of judges are normally idiot toast breads: 🍞

fear detection

m57

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
With Neurosky MindWave you can read attenuation or meditation, so we guess one electrode (t1 card) would be sufficient to extrapolate for example also the parameter fear. And if they would show something like cAPI Card on eg. Facebook stream and would find out that the victim gets paranoid or fears that, they would loop such scenes until the victim tries to commit suicide or runs amok. So this card would be an important element for eg. c06, b01 or a16 card, since the offender does not only want to own or kill the victim, the group would feel good when the victim is revictimized, so the real offender would play m37 card on the group for later using the dt1 card against the group, normally if you could prove that to the offender he says something like "it's just training", "we only want to hel" and a lot similar lies, so question if one of the offender says "it's just training", combined with m54. Workaround: Listen to music you love, I use wireless headphones to not disturb my neighbors. I guess the music makes it harder for detection algorithms to identify emotions.

3D model of victims body

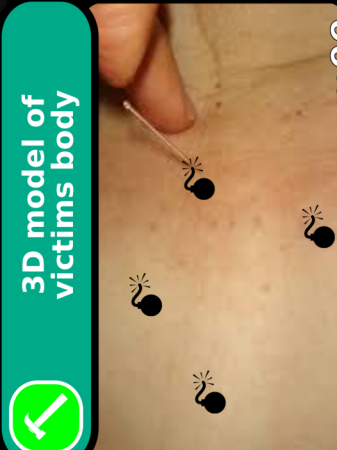

m99

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
Like the m98 Card they seem to have also a 3D model of my body, most likely generated from a RetinaCCD (eye1) and they also add eventriggers (t14) that then eg activates electronic psychological warfare, eg chains like c06 ⇒ m32 ⇒ m94 ⇒ m44 ⇒ m93.
Not yet found out how to workaround that problem, I will update this card when I found out, and maybe make some videos to explain.

This card seems to have several DEFECON Level

If I say: "Hansjürg now asked his mummy for help" the algorithm gets more worse, additional it seems that the System or Project Paperclip then gives out more informations about the complete domin model of the alleged infiltration of switzerland, maybe to obfuscate the 1940s neurology classes? "Chemitrode gesicht" *rcd10-f44x* <-

Voice Delay + overlay different person

m81

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
I guess there is some software on the communication systems, that can identify common sentences a person says within less than 1 second and then plays the same sentence your equal aged friend would like to say to you with the voice of an old pedophile person. If the Aversion Archetype even (cyber)raped the young person this would revictimize him or her, maybe even making her doing a suicide (attempt).

The people doing this listen days or weeks until they have some sort of a touring complete avatar (NSACIA Dataretention?) for voice, then it is maybe automated until the victim is dead. Maybe also in context with pedophile people that want to rape their own kids. Would destroy good situations with equal aged, because the kid that is being targeted would try to commit suicide and the other kids would disconnect to protect themselves. So they isolate kids for c06, m4, m32, m44, m52, m53, m54, at1, (other kids would get dt1 card). unknown: we must patch that somehow.

I feel good because I'm not separated from the equal aged

Real Person Speech

dy=0.5s

because I feel betrayed, distrust, paranoia
I feel cyber-raped, I then often try to commit suicide
here they start t1 && b1 ⇒ c06, m32, m44, m46
victim focuses on dialog instead of the technology

simultaneous "Chess" "Game"

m120

<https://0x8.ch/HackersCardgame17>

Inventor: xxxxx
-> Title

maybe one could derive the size of the attacking group by the size * IQ of the defending group

or maybe one could derive also the size of the attacking group if the defending group would count the number of the "You son of a b****" per Minute
